

Be sure to place this information in each file. I will deduct 1 point for each file missing this information and also 1 point if your name does not appear in the output.

```
// Your Full Name
// Your E-mail @my.smccd.edu
// CIS 255 WJ
// Class Name
// Class Description
// Lab #
// Date-Due: 10/4/2012
```

Do exercise 10.8 on page 436. You will have to modify all of the constructors in the Employee super and subclasses to include a Date parameter for the birthdate. In the PayrollSystemTest application do NOT give the BasePlusCommissionEmployee a raise. Instead you will give a \$50 bonus to any employee with a birthday in the current month. Make sure that at least one employee receives the birthday bonus. You should mention the birthday bonus in the output. Add get methods to the chapter 8 Date class.

Your name must appear in the output. You must follow the Programming Guidelines.

.

SUBMIT: All files (14 total) must be compressed into a single zipped file named lab4.zip and uploaded to WebAccess. Find the week that the lab is due and click on the upload link. You must use PKZip or a similar utility to compress your files.
